

Robo Door Introduction

Robo Door has been manufacturing their own products since 1995, and currently offers a variety of products and services.

Our products are distributed national and internationally by our own sales offices and approved independent agencies and franchises throughout South Africa.

Robo Door products are manufactured from either:

- Mild Steel or
- Aluminium or
- A combination of both

Products that are manufactured from mild steel have various protective options, and are selected for various reasons, i.e. humid, high corrosion areas. You could select a mild steel door with the following protective coating options:

- **Standard: Mild Steel Product**, Passivated and Powder Coated to suit your colour range.
- **Electro Galvanized: Mild Steel Product**, Chemically Cleaned, Electro Galvanized, mostly suited for Inland Humid and Coastal Areas. Powder Coated to suit your colour range.
- **Hot Dip Galvanized: Mild Steel Product**, Chemically Cleaned, Hot Dip Galvanized, ideal for Coastal and High Humid Areas. Powder Coated to suit your colour range.
- Our **Aluminium Robo Door Retractable Trellis** has become very popular in the Coastal Areas, and offers the Client good value for monies, as this product is totally corrosion resistant, all its parts is manufactured from Aluminium, excluding the Stainless Steel Roller Bearings in the Top Track.

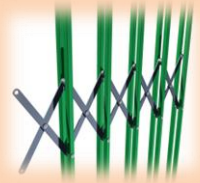

ROBO DOOR BENEFITS

- Meet insurance security requirements.
- Available in a range of attractive colours.
- An ALL STEEL DOOR with no plastic parts, for ultimate strength.
- Custom manufactured, offering you 4 sided protection.
